Office Action Summary

Application No.

10/774,419

Applicant(s)

TAKEI ET AL.

Examiner

Chuong A. Luu

Art Unit

2818

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 5/24/2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,3-10,12 and 15-18 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,3-10,12 and 15-18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION
PRIOR ART REJECTIONS

Statutory Basis

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The Rejections

Claims 1, 8-10 and 15-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Kawano et al. (U.S. 6,881,058).

Kawano discloses a heating apparatus with

(1); (7) a heating plate (202) for heating the mask substrate (W) disposed on a first side of the heating plate (202) having a front surface and a side surface (see Figure 2);

heating means (203) for heating the heating plate (202) (see column 6, lines 22-27);

a frame member (205) disposed on the first side of the heating plate (202) so as to overlap the heating means (203) as viewed from the first side, having an inner peripheral surface and a first clearance between the inner peripheral surface and the

side surface, being detachably disposed to the heating plate so that the frame member (205) is disposed around (see Figure 2);

(8) further comprising: means for detecting a temperature of the mask substrate; a controlling portion for controlling the driving mechanism in accordance with the detected temperature (see Figure 2);

(9) wherein the controlling portion determines whether of the mask substrate is in a the temperature increasing state or in a constant state in accordance with the detected temperature, controls the driving mechanism so that the distance between the frame member and the side surface of the mask substrate placed on the heating plate becomes a first distance when the wherein the controlling portion temperature of the mask substrate is in the increasing state and a second distance smaller than the first distance when the temperature of the mask substrate is in the constant state (see Figure 2);

(10) wherein the frame member is divided along with the side surface in a peripheral direction of the mask substrate placed on the heating plate (see Figure 2);

(15) further comprising a supporting portion for movably supporting the frame member so that a second clearance is formed between the frame member and the heating plate (see Figure 2);

(16) wherein the frame member and the supporting portion comprise material having a heat conductivity (see Figure 2).

(17) further comprising a heater, different than the heating means, disposed in the frame member (see Figure 2);

(16) further comprising a clearance between the frame member and the first side of the heating plate (see Figure 2).

PRIOR ART REJECTIONS

Statutory Basis

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The Rejections

Claims 3-6 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawano et al. (U.S. 6,881,058) in view of Fukunaga et al. (U.S. 6,743,395).

Kawano teaches everything above except for wherein the inner peripheral surface is curved in a different shapes such as concave, convex, a mirror surface and a rough surface; heating a semiconductor wafer having a diameter of 10 inches.

However, Fukunaga discloses an apparatus with the inner peripheral surface is curved in a different shapes (see column 18, lines 55-64; column 20, lines 35-40; column 27, lines 10-11). Even Kawano and Fukunaga do not explicitly disclose a semiconductor wafer having a diameter of 10 inches. However, a semiconductor wafer having a diameter of 10 inches is considered to be obvious. Therefore, it would have been

obvious to one having ordinary skill in the art at the time the invention was made to modify the teaching of Kawano (accordance with the teaching of Fukunaga) since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art and it is noted that the applicant does not disclose criticality in the ranges claimed. In re Aller, 105 USPQ 233 (see MPEP 2144.05). Doing so would facilitate the manufacture of the semiconductor device and increase the heating of the semiconductor wafer.

Response to Arguments

Applicant's arguments filed May 24, 2007 have been fully considered but they are not persuasive.

Applicant argues that Kawano fails to teach or suggest a mask substrate disposed on a first side of a heating plate and a frame member disposed on the first side of the heating plate. This assertion is respectfully traversed. Kawano depicted in Figures 21, 23-24 or 26-27 or 59A-59B suggests that disposed on a first side of a heating plate and a frame member disposed on the first side of the heating plate.

In view of the foregoing, it is believed that the rejections of claims 1, 3-10, 12 and 15-18 under 35 USC 102 and 103 are proper.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuong A. Luu whose telephone number is (571) 272-1902. The examiner can normally be reached on M-F (6:15-2:45).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven H. Loke can be reached on (571) 272-1657. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
